1981

The **HEALTH CARE FINANCING ADMINISTRATION (HCFA)** was established to combine health financing and quality assurance programs into a single agency. HCFA is responsible for the Medicare program, Federal participation in the Medicaid program, the Professional Standards Review program and a variety of other health care quality assurance programs.

The mission of the Health Care Financing Administration is to promote the timely delivery of appropriate, quality health care to its beneficiaries—approximately 47 million of the nation's aged, disabled and poor. The Agency must also ensure that program beneficiaries are aware of the services for which they are eligible, that those services are accessible and of high quality and that Agency policies and actions promote efficiency and quality within the total health care delivery system.

The mission of the Health Standards and Quality Bureau (HSQB) is to direct activities to assure that health care services provided under Medicare and Medicaid are furnished economically consistent with recognized professional standards of care. To carry out this mission, HSQB develops health quality and safety standards for Medicare and Medicaid in conjunction with the Public Health Service; develops and implements conditions and standards under which providers and suppliers are certified for participation in Medicare and Medicaid; and develops and implements programs of professional standards review, related peer review, utilization review, and utilization control programs.

This **Directory** is one of the informational products prepared and distributed by the National Health Standards and Quality Information Clearinghouse (NHSQIC). NHSQIC, sponsored by HSQB, is responsible for the collection, processing, storing and dissemination of technical and programmatic information concerning the functions and activities of HSQB.

INTRODUCTION

This directory lists all Home Health Agencies participating in the Medicare/Medicaid programs as of December 31, 1980. It should be useful to individuals and organizations interested in determining the location of such agencies nationwide. It should also assist physicians in referring patients to home health care.

Agencies are listed alphabetically by state and by city within each state. Following each agency's address, information is provided on its ownership and the scope of its services. Since the great majority of agencies are non-proprietary, only the notation "proprietary" is given, on the line immediately following the address. The last line of each entry contains a series of codes indicating the services provided; the codes are explained in a note at the bottom of each page. An appendix lists other abbreviations used in the directory.

The information in this directory has been reported to the regional offices of the Health Care Financing Administration by the home health agencies themselves; it has **not** been verified for accuracy. Users should report any discrepancies to the following address:

Health Care Financing Administration
Health Standards and Quality Bureau
2-K-3, Dogwood East Building
Baltimore, Maryland 21207
